

PUBLIC ENTITIES PARTNER WITH REGENEXX TO REDUCE ORTHOPEDIC SURGICAL SPEND

Controlling the cost of a public sector organization’s health insurance is an ongoing battle for those managing the group health and or workers’ compensation plan/fund. Orthopedic and musculoskeletal spend accounts for nearly 30% of a plan sponsor’s overall healthcare spend annually. The Regenexx Corporate Program allows self-funded public sector organizations to partner with the Regenexx Physician Network to reduce their orthopedic surgical spend by over 80%. Regenexx procedures can successfully intervene on 70% of outpatient procedure.

What is Regenexx?

Regenexx provides advanced regenerative treatments within the specialty area of Interventional Orthopedics. Regenexx procedures allow the avoidance of orthopedic surgeries by using a patient’s own Orthobiologics to repair and rebuild damaged bone, cartilage, muscle, tendons, and ligaments. Our minimally invasive procedures use precise image-guided injections and are performed by a board certified physician trained in over 85 types of orthobiologic procedures.

Public Entities Case Study
