

## Dental: Did You Know?

- Research has linked good oral health and overall health.
- A dental visit is more than just teeth cleaning. It's also preventative healthcare.
- Poor oral health can lead to gum disease. Gum disease is associated with an increased risk of certain types of cancer, heart disease and pre-term or low birth weight babies.
- An exam can also identify serious health concerns like heart disease and diabetes.
- Early detection can save your health, make diseases easier to treat and save you money.
