

Dental Insurance

Boost the Value of Your Benefit Package with One of the Most Requested Benefits

Did you know that dental coverage is essentially a wellness plan that helps prevent costly health problems and lost time from work? Adequate preventative measures, including regular dental check-ups, can impact your entire employee benefits program.

Research has linked good oral health and overall health. In fact, studies have shown a relationship between periodontal disease and diabetes, cardiovascular disease, stroke, and adverse pregnancy outcomes: all potential high-cost claims on your Health Insurance plan.

Whether employer- or employee-paid, Dental Insurance breaks down the barrier to routine preventive dental care and can lessen the claims risk on your Health Insurance plan.

Service. Flexibility. Pricing. Now You Can Have All Three

NIS' Dental plans are so tailored to public sector organizations, you may be hard-pressed to find this level of service and plan design flexibility anywhere else. And equally important, we closely monitor our carrier's pricing by keeping close tabs on industry trends to avoid any unnecessary rate increases in the future.

Limitless Customization

We have the ability to customize right down to the finer details often requested by school districts and other local governmental organizations. No cookie-cutter plans.

Network

We work with a variety of carriers and can usually match your current network.

Expect to Stay with Us

Once you team up with us, expect to stay. Our customers are so happy with our services that over 97% of our customers renew each year.

Do your employees even want a Dental Insurance plan?

Or not sure if your new plan design meets the needs of your employees? As part of our services, we can conduct a survey of your employees to gauge interest level before we put a new plan in place! There is no obligation on your part and this service is free of charge. Call us today!
