

Improve Employee Education and Streamline Your Human Resources with NIS Enroll

Many public sector organizations like yours are facing the same difficult issue: How do you educate employees on all their benefits? We have a solution. It's our proprietary benefit administration and online employee enrollment system called NIS Enroll.

Personalized Experience

NIS Enroll offers one-on-one, personalized telephonic employee enrollment meetings to help your employees make the best decisions for their needs. Your employees get the personalized experience along with the education and communication they're looking for to help them understand and make the best use of their benefits.

Online Enrollment and Benefit Archive

Employees get the safety and convenience of online enrollment and year-round access to information on all their benefits.

During open enrollment, employees sign up for coverage, line-by-line, for their medical, dental, life, long term disability, and all the benefits you offer.

Streamlined HR Processes

Easy-to-use reporting tools with all your employees' benefit information in one central repository. Plus, you gain peace-of-mind knowing your benefit package aligns with all government regulations.

NIS Enroll allows you to carry out employee benefit education, communication, enrollment, and most human resources tasks electronically.

Provided at No Extra Cost

NIS Enroll is provided at no extra cost through the sale of voluntary, financial protection products offered to your employees.

When employees elect these programs, all plans are voluntary and designed to suit each individual's own needs and discussed at the time of enrollment with their benefit advisor/counselor.
